Aging with Grace

To all Fund Participants:

We are excited to announce a new voluntary benefit in response to your concerns and suggestions. We recognize that more and more American workers are faced with dealing with eldercare issues. Whether this means checking on a parent, taking a loved one to a medical appointment, having a family member move in or providing for alternate living arrangements, this causes stress and a disruption in our normal lives.

The Funds have joined Aging with Grace LLC, to bring you the premier solution to your eldercare issues.

Aging with Grace has embraced the mission of educating, coordinating and facilitating the many eldercare issues that face you each day. They recognize that this is both emotionally and physically draining. Planning for the current and future needs of your aging loved one takes time and money - both of which are often in short supply.

Assisting an elderly loved one is not a one-time event. It is ongoing and constantly changing as medical, social and financial needs evolve.

For a nominal yearly membership fee of \$34.95 per family, Aging with Grace™ will help you navigate through the murky waters of eldercare. While the puzzle may look unsolvable to you today, Aging with Grace will help you develop a workable plan for tomorrow.
